### Greetings from Bernat®

Part of my job is to be very familiar with all the different products that we offer. This works out perfectly for me since I'm a new knitter and am constantly trying out different yarns and experimenting with various fibers. I always have about 5 projects on the go; it has actually become an obsession for me. When I first saw Bernat® Baby Stretch I fell in love with the colours, they are so bright and cheerful, perfect for little ones. I also love the fact that the yarn is not only soft and cuddly but stretchy and bouncy, what a fun concept! Since my tension tends to be a bit tight I was a little worried about knitting with Bernat® Baby Stretch but it was fine, I love the fabric this yarn produces. I think I'm going to have to start working on a new project in Bernat® Baby Stretch. The obsession continues...
